

Features

Size	2,7 kg (6 lb)
Ingredients	Food grade diatomaceous earth Calcium Montmorillonite
Certification	OMRI Lister, may be used in certified organic production or food processing and handling in accordance with the Canadian Organic Standards.

What is Fresh Coop dust bath ?

The Fresh Coop dust bath is a dust bath for backyard chickens that promotes a regular and healthy smoothing routine. This helps to keep your backyard chickens happy and healthy and to keep the feathers in top condition. Composed of Codex food grade diatomaceous earth (food grade) and montmorillonite calcium, this unique natural blend of diatomaceous earth helps keep feathers clean by absorbing excess oil.

Dusting is part of the daily smoothing maintenance of your hens and keeps their feathers in perfect condition.

A clean flock is healthy flock and healthy flock is a happy flock!

Application

TIPS

- During hot summer days cool down your flock by placing the dust bath in the shade. During cooler weather place the dust bath in a sunny spot.
- Digging a shallow hole to place your container will anchor your dust bath in place. To avoid containers filling with water, drill 4 to 5 small holes along the bottom.
- If you're using a container, fill the bottom first with sand or dust and then with the dust bath.

Free range

Sprinkle the dust bath over the existing dust bath area or make an area close to the coop 2 to 3 in. deep.

For a flock of 1 to 3 chickens

Fill 3 to 4 in. deep with the dust bath in the container (ex. : large kitty litter pan).

For a flock of 3 to 7 chickens

Fill 3 to 4 in. deep with the dust bath in a wooden box of 2 x 3 ft.

For a flock of 8 chickens or more

Kiddie pools or turtle sandboxes make great dust bath containers. Fill 3 to 4 in. deep with the dust bath.
